

Farmer: Player Guide

Upon launching the game, you will see this window:

This is your farm. Your goal is to grow plants, keep chickens and make money by selling the resulting products. You have four farms and one chicken coop to work with.

Before you can do any farming, you need to buy seeds. You can do that by heading to the shops using the blue arrow. You will see this screen:

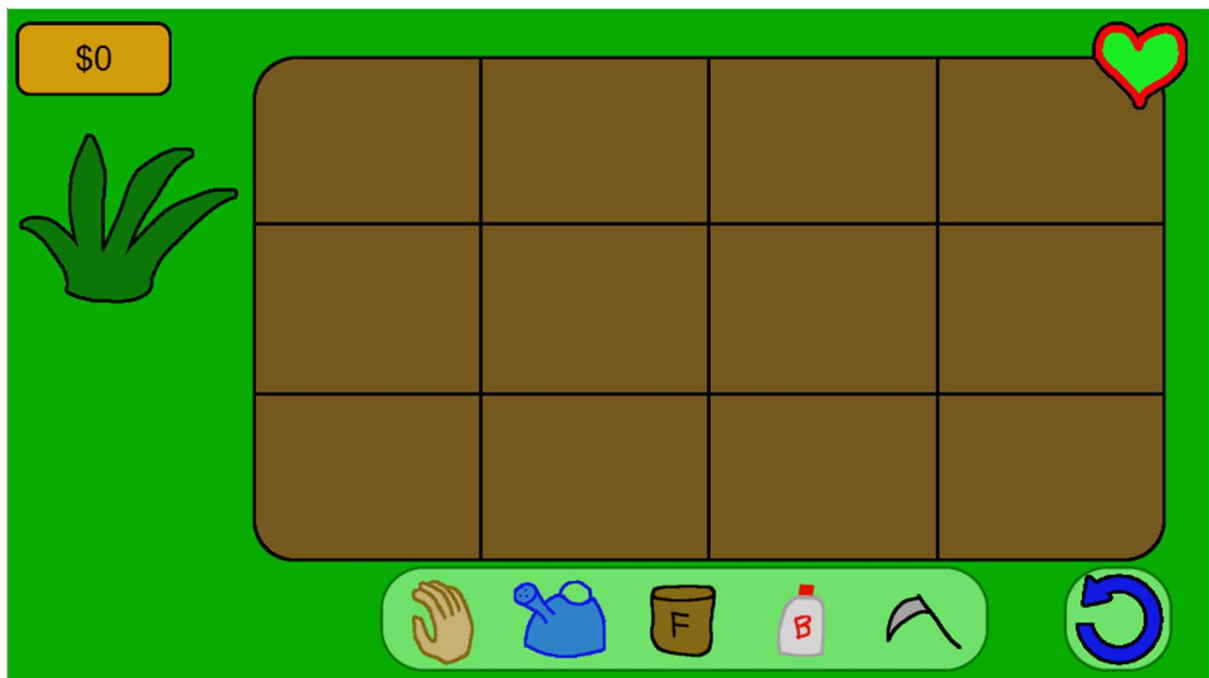

You can enter the Seed shop by clicking on it. Once inside, you will see the available selection of seeds. See how much they cost by hovering over them and buy by clicking. The more expensive plants will take longer to grow, but they will sell for more profit. Some may even be harvestable multiple times without replanting. You can see your money balance in the top left. You start with \$100. You can exit the shop using the arrow.

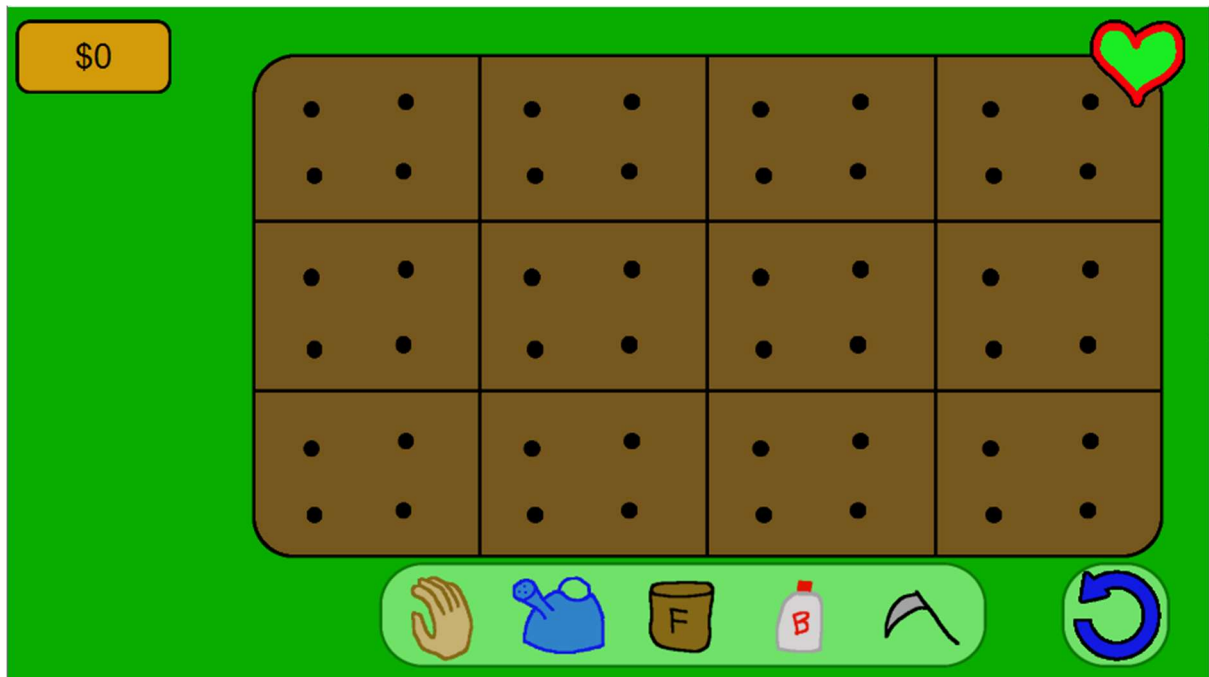

Later, you will be able to buy chickens at the chicken shop nextdoor, but you won't have enough money at first. Head back to your farm using the top arrow on the Road.

Select one of your farms and enter it by clicking on it. You will see this view:

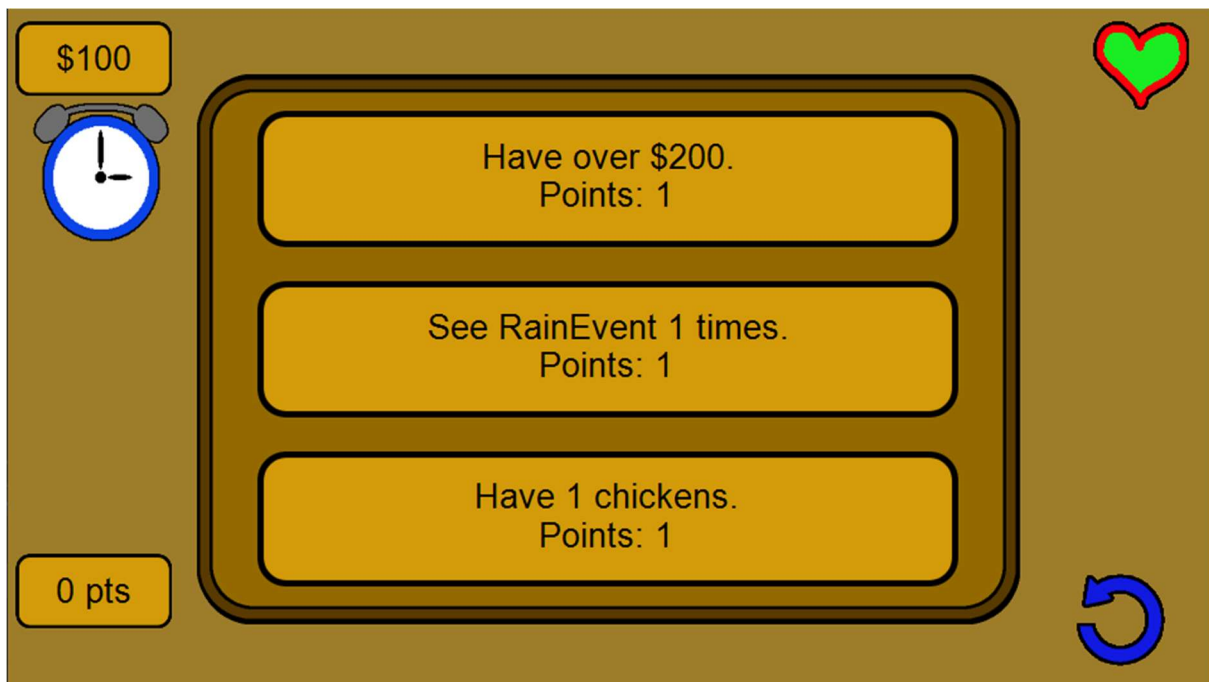

You can plant purchased seeds by clicking on the plant on the left. You will see the planting menu. Plant by clicking on a seed you have at least one of. A planted farm will look like this:

Now you must take care of your farm. Use the Pail tool to water your plants. Unwatered plants do not grow. You may use the Fertilizer Bag to speed up you plants' growing process. Your plants may be attacked by Worms, which you must get rid of using the Bug Spray Bottle. If you don't, the plant may die. If you wish to get rid of a plant, you can do so by using the Scythe.

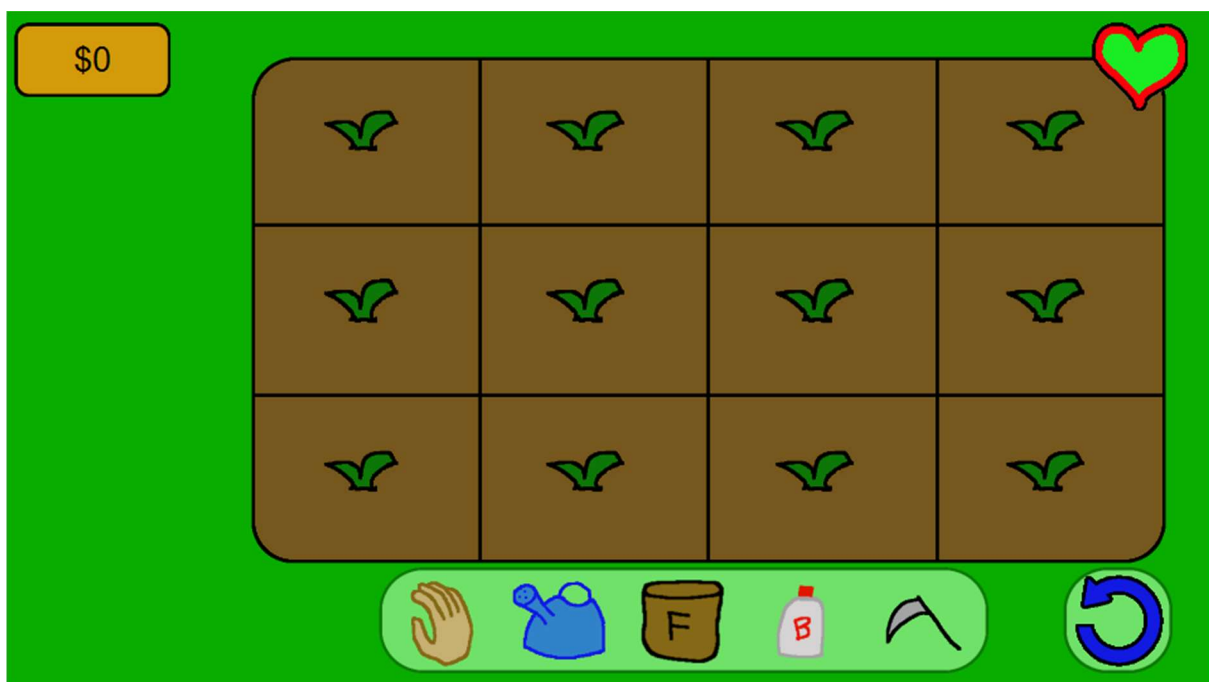

Each action you take will take up some of your stamina, which is indicated using the Stamina Heart on the top right. If you run out, you cannot do any more work that day.

Once your plants are taken care of, you may end the day. You can do so by exiting the farm using the return arrow and clicking the white house. You will see this screen:

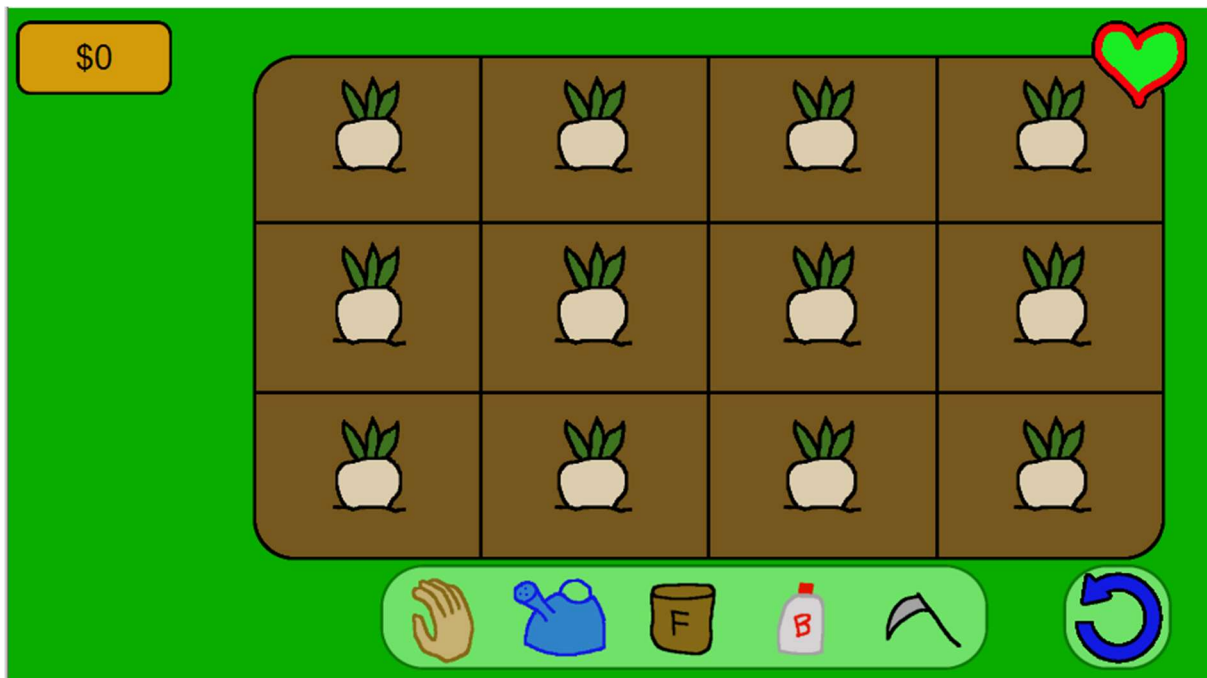

Here, you can view the Challenge Board. Try to complete the challenges to earn as many points as you can!

Click the Alarm Clock to end the day. If you go back to the same farm, you will see that your plants have grown, provided you've taken proper care of them:

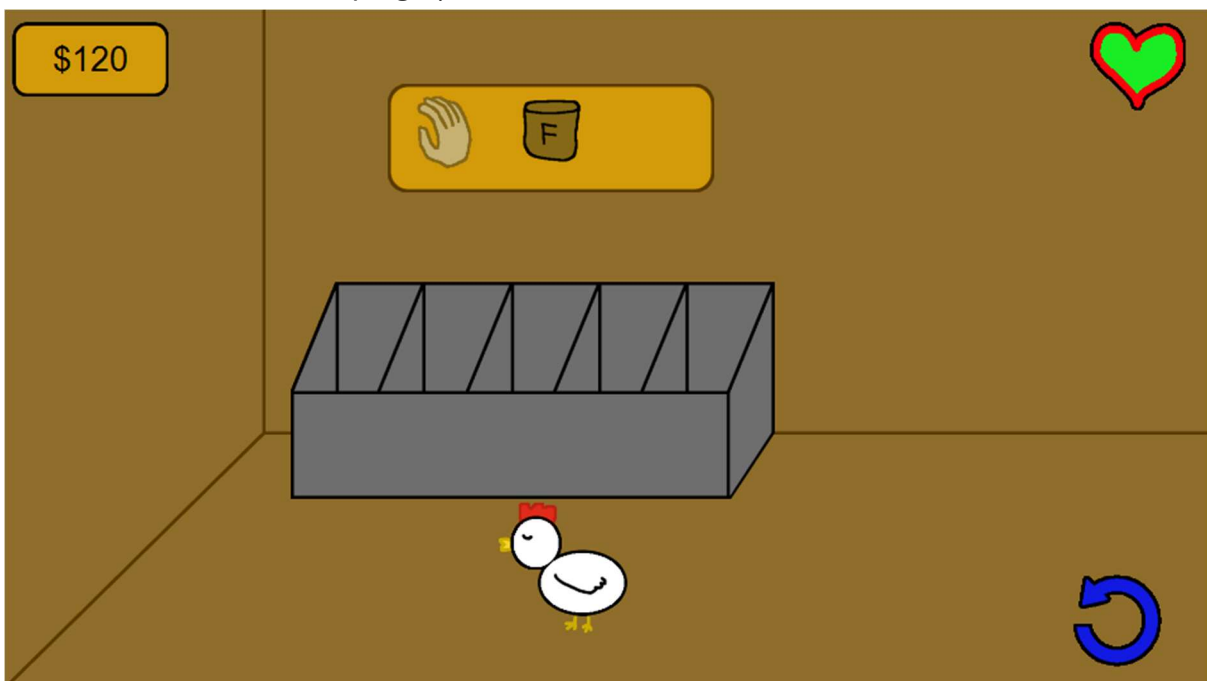

Continue to do so, until your plants are all grown and ready to harvest:

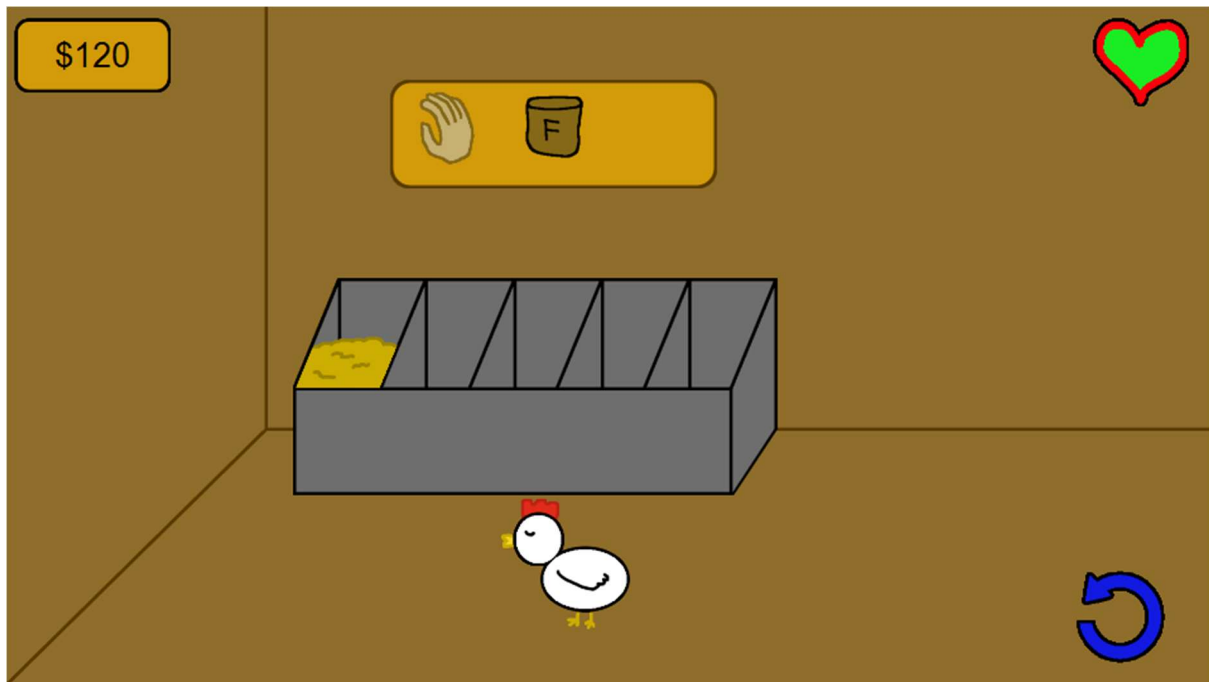

Use the Hand tool to pick them up and sell them by clicking the Harvest House. You will earn money for each product sold. Use the money to buy more seed and continue earning more!

Once you earn \$1000, you can head to the Chicken Shop to buy a chicken. The chicken will be delivered directly into your Coop. You can enter your Coop by clicking on it (it's the brown house in the top right). It will look like this:

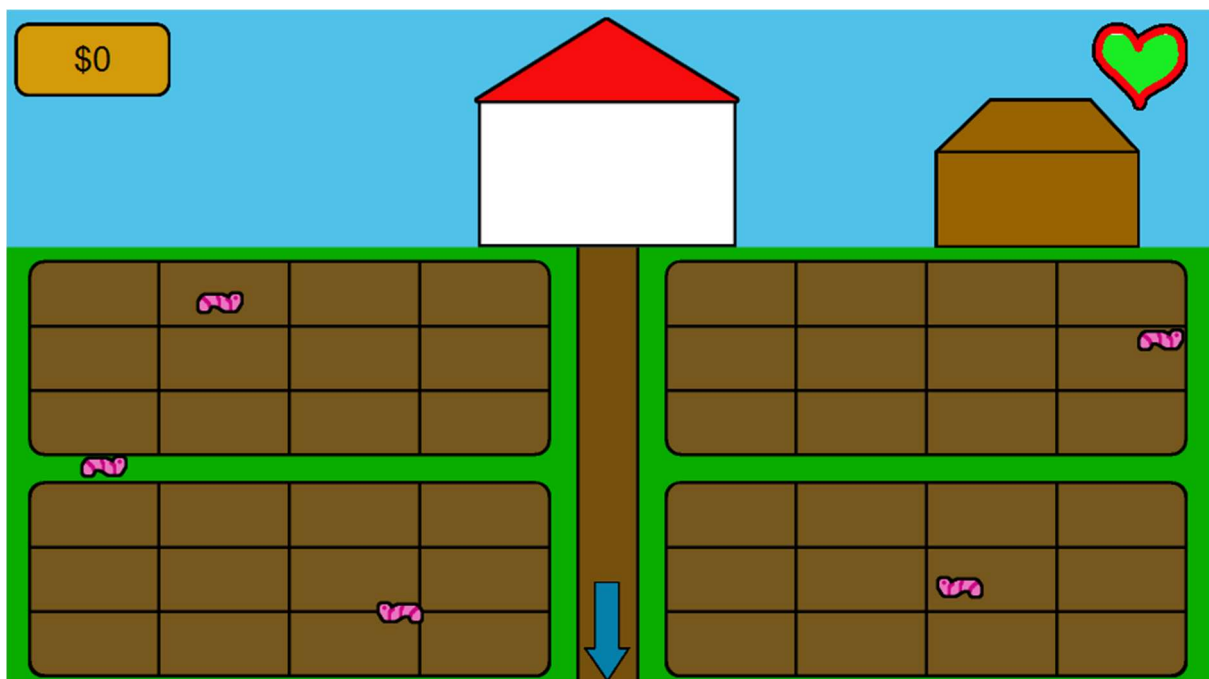

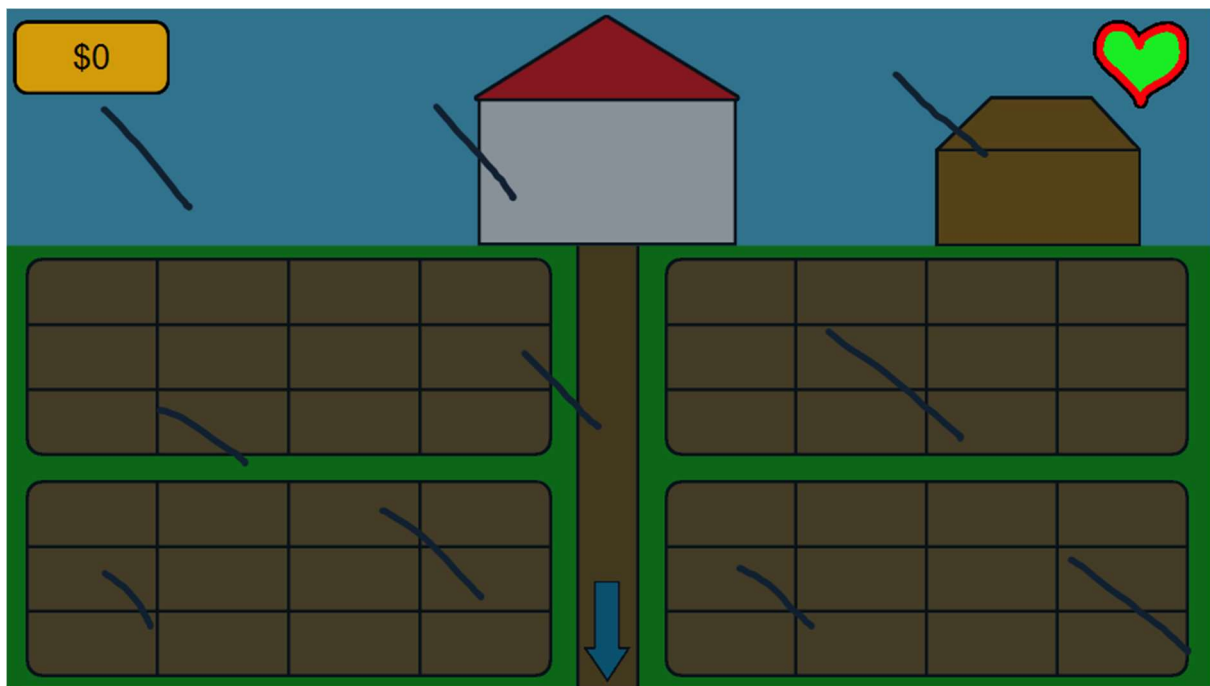

Here, you can see all the chickens you own. You can own up to 5 chickens. They will lay eggs, which you can sell for profit. To have your chickens lay, you must feed them. You can do so by using the Feed Bag on the Feeder. The feeder will fill up and look like this:

You only need to fill up as many slots as you have chickens. Each fed chicken will lay an egg overnight. You can sell them using the Hand tool.

Sometimes, you will encounter Random Events. These can be either helpful (like rain, which waters your plants for you), or harmful (like a worm infestation, which will give your plants many bugs to get rid of). If an event occurs, you will see it on your farm visually:

Continue playing and become the best Farmer!
